Introducing Valen ModX

Valen ModX is the brainchild of accumulated years of experience supporting clients with their remote power requirements. As the world continues to evolve into the AI space, power in remote locations is becoming increasingly essential.

Valen ModX is designed utilising a tried and tested range of Valen core products, allowing the ModX to perform in perfect synchronisation. Valen WeCo Battery System, Valen Industrial Field Cabinets, Valen Solar Panels and Solar Controllers all come standard, with optional extra's able to be added to retrofit to your project requirements.

ModX is modular, maintenance-free and easy to install and operate making it an ideal solution for the remote extreme-temperature regions of Australasia.

Advantages of ModX

- Australian made and engineered means product support and spares are readily available
- All components are under 1 tonne for easy transportation
- Quick installation as no ground penetration is required
- Portable system structure available as an option for sites with changing requirements
- Modular systems meaning they can be expanded as the need arises
- Solar panels are able to be installed at ground level minimising the need for WHS equipment
- Remote monitoring for easy tracking of multiple remote sites

Optional Extras

Customise your system to your site. Valen ModX optional extras allow you to ensure your system is ready to go for challenging site locations.

- AC and DC Diesel Generator with Bunded fuel tank (Remote/ AutoStart, Tank Levels & Temperature Sensors)
- 48V Wind Turbine - 220W>
- Larger Industrial Field Enclosure to house additional Equipment
- Upgrade to Cyclonic Wind Rating
- Precast Concrete Pads
- Coastal/ Corrosive Environment upgrade
- Perforated screen on 3 sides to shade and protect equipment

Electrical Capabilities

- Valen Power ModX range uses highly efficient solar panels and is configured to harness the maximum Power in lowlight periods.
- The ModX unique Panel-tilt system allows techs to easily adjust angle to suit site requirement on install or should they change.
- ModX comes standard with the managed Weco Italian designed rack-mount units due to their ability to provide 7000 cycles to an 80% DOD and full visibility for Asset managers/ NOC.
- The ModX comes standard as a 48VDC unit to ensure efficiency and minimal losses. DC-DC conversion to 12/24VDC available. (Also 230Vac in Single, Split, and 3 Phase available on request.)
- Real-time data, monitoring, configuration, and control, including batteries are remotely or locally visible. Multiple ModX's can be live on the one dashboard making asset management easy.
